MVP Presentation

Project Details

This part of the form is filled in by the project team.

Project	The Green Mile
Team number	5
Team members	Hugo Jansen, Marnix van der Heijden, Shaan Nankoe, Thom Koper, Niklas Kiess
Client name	Tom van Arman
Date	14.04.2026
Sprint	2

Client Evaluation

This part of the form is filled in by the client.

Criteria	Value					Feedback/remarks
Usability <i>To what extent the product can be used to achieve the goals of the client.</i>	1	2	3	4	5	Good progress towards an end-to-end working system. The prototype now demonstrates core functionality, but remains somewhat fragile. With the upcoming PCB improvements and better assembly, it is likely to become field-ready soon.
Ease of use <i>To what extent the product connects to - and is usable for the target audience.</i>	1	2	3	4	5	Connectivity and usability are improving, especially with the stable integration to the MQTT backend and Grafana dashboards. Both devices are now consistently sending data, though further validation in real-world conditions is needed.
Size <i>The size of the delivered product, taking into account the available development time.</i>	1	2	3	4	5	A strong sprint in terms of output. The team delivered meaningful improvements by effectively dividing tasks, resulting in a more robust and complete system within the available time.
Complexity <i>The complexity of the delivered product,</i>	1	2	3	4	5	The project remains technically complex, but the team handled

Studio Smart Cities

<i>taking into account the available development time.</i>						this better than in the previous sprint. Clear task division and ownership helped manage the system's complexity more effectively.
Quality <i>The product is of such quality that it can actually be used by the target audience; the product contains few or no errors.</i>	1	2	3	4	5	The prototype is still in a rough, early-stage state, but now functions reliably. There is improved control over system components, including battery performance and backend communication, though further refinement is needed.
General Feedback A clear improvement in teamwork, structure, and delivery. The team is not yet at a fully field-ready stage, but they are getting close. This sprint provides a solid foundation for the next phase, where real-world testing and multiple connected devices will be key. Looking forward to supporting the upcoming field tests.						

Handleiding MVP Presentation Opdrachtgevers

Dit document is bedoeld voor opdrachtgevers van projectgroepen van de studio Smart Cities van de Hogeschool van Amsterdam.

Bij het onderdeel 'Client Evaluation' willen we vragen om de MVP-presentatie van het team te waarderen door per criterium een waardering te geven (cijfer 1 tot en met 5), en feedback te geven waarmee het team de volgende keer dit onderdeel beter kan doen.

Criteria

De betekening achter de verschillende criteria is als volgt:

- **Usability/Bruikbaarheid:** In hoeverre het product kan worden ingezet om de doelen van de opdrachtgever te bereiken;
- **Ease of use/Gebruiksgemak:** In hoeverre het product aansluit op - en bruikbaar is voor de beoogde doelgroep;
- **Size/Omvang:** De omvang van het opgeleverde product, rekening houdend met de beschikbare ontwikkeltijd;
- **Complexity/Complexiteit:** De complexiteit van het opgeleverde product, rekening houdend met de beschikbare ontwikkeltijd;

HBO-ICT PRESENTS

Studio Smart Cities

- **Quality/Kwaliteit:** Het product is van dusdanige kwaliteit dat het daadwerkelijk kan worden gebruikt door de doelgroep, het product bevat weinig of geen fouten;

General feedback

In dit onderdeel kan je feedback kwijt wat niet past in de verschillende criteria.

Wanneer het formulier volledig is ingevuld kan deze als pdf-bestand door de studenten worden ingeleverd in de digitale leeromgeving.
